Branch Roll-out Solutions

Growing business demands a proper IT infrastructure planning and deployment, especially when there is new branches openings happens for the expansion. When there is in the growing phase most of the organizations will be compromising on infrastructure specially on IT infrastructure deployments, a faceable IT deployment roll-out plan will be very much helpful in improving the efficiency and reducing the cost. ZION offers a single window approach and reach out our services and solution offerings along with your Business growth. Our experience and project management skills will help you achieve the better results and eases the pain of managing different people.

Our Cloud offerings and System integration capabilities will be extended to our customers who ensure a low cost, better planned execution of branch roll-out.

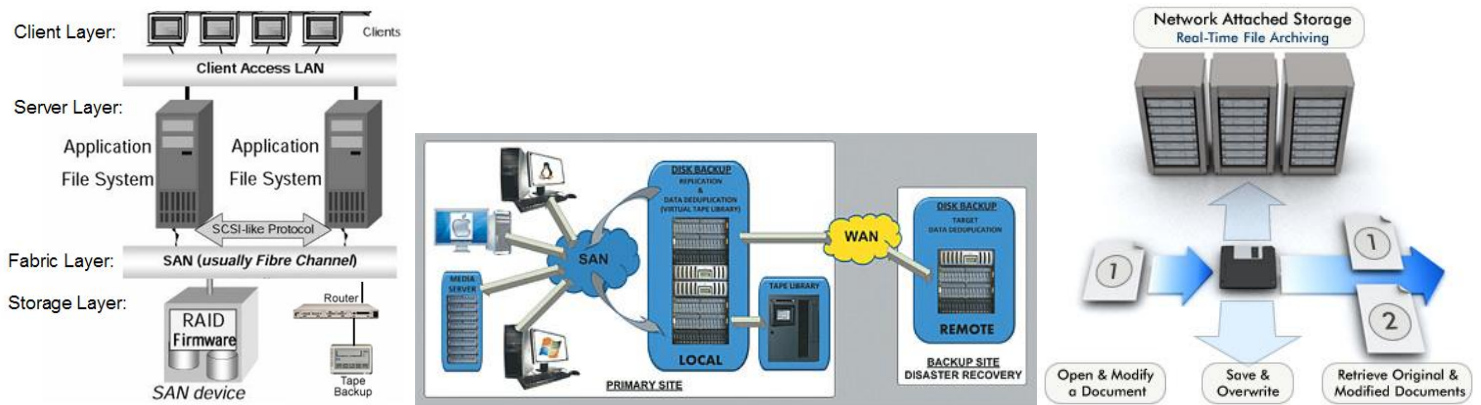

Peace of Mind Guaranteed

Storage & Backup Solutions

The following areas of Storage & Backup technology we are prominent with, As a part of our offering we consult, design, implement and maintain the products and solutions mentioned below.

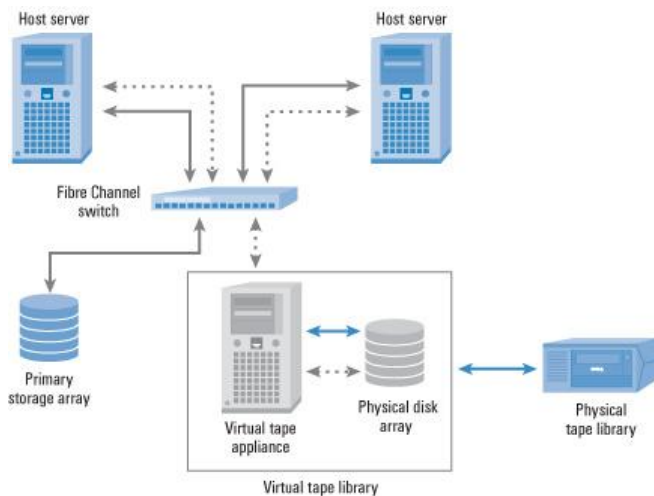

Storage Solutions

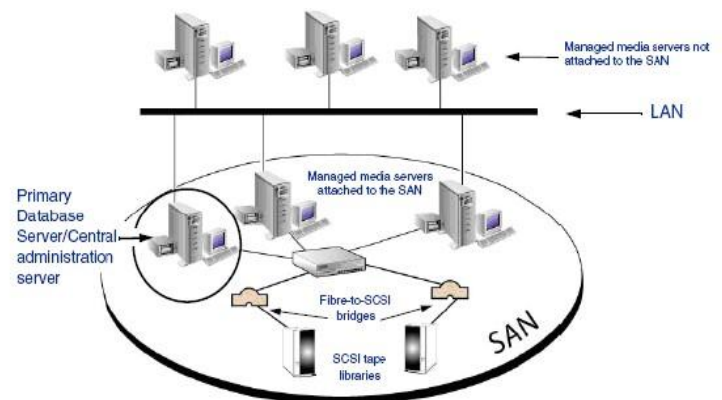

- ✓ Storage Attached Network (SAN)
 - ✓ Solid State Storage
- ✓ iSCSI Attached Storage (iSCSI)
- ✓ Network Attached Storage (NAS)
- ✓ Direct Attached Storage (DAS)

- ✓ Data De-Duplication
- ✓ Content Addressable Storage, ILM
- ✓ Optical & DVD Drives & Libraries
- ✓ Hard Drives

Backup Solutions

- ✓ Tape Drives
- ✓ Tape Libraries
- ✓ Data De-Duplication
- ✓ Virtual Tape Library
- ✓ Data De-Duplication
- ✓ Backup to Disk
- ✓ Continuous Data Protection

- ✓ Business Continuity
- ✓ Data Archive, Protection and Compliance CAS, Single Instance Store, WORM, eDiscovery, Replication
- ✓ Disaster Recovery, Storage Management Solutions
- ✓ Encryption & Verification
- ✓ File Migration

ZION as a Network Solution Provider

Today's enterprise networks are in transition. Business needs demand ever more powerful, reliable, secure and scalable networks that can lead to increased profitability and accelerated business success. Across the network new mission critical applications are being deployed to increase employee productivity and decrease operating costs. For today's Enterprise customer, gaining a true competitive advantage from their network requires that enterprises reduce network complexity and bottlenecks, while providing better application and network response time.

ZION provides the speed, performance, and flexibility required for today's enterprise networks. Data networking solutions include a broad portfolio of products designed to securely deliver Layer 2 connectivity, Layer 3 routing and Quality of Service, combined with Layer 4-7 content-aware intelligence. Our partnerships and engagement with Global Leaders enable us to do the following services at the best.

- Structured Cabling
- Implementation of Highly available, Easily manageable, Secured physical network solutions
- LAN, WAN & VPN implementation assistance
- Wireless Solutions
- Integrated DATA & VOICE Solutions
- Bandwidth utilization control solutions
- Logical Network (Domain) implementation and maintenance
- Video surveillance integration
- Rich experience in deploying campus wide networking solutions

Security Solutions

We provide the security solutions mainly in the following areas

1. Enterprise Network & information security solutions
 - a. Antivirus/Gateway Antivirus
 - b. Internet Access Management
 - c. End-Point Security/Encryption
 - d. Firewall & Unified Threat Management
 - e. Mail Security
 - f. VPN
2. Physical Security Solutions
 - a. CCTV Surveillance Solutions
 - b. Access control solutions
 - c. Automatic Alert / Alarming solutions

Interactive Solutions

Interactive Solution Offering from ZION is focusing to improve the experience while interacting with audience, Let it be the students or the audience for a presentation making the content more interactive help to simplify the challenges and improve the effectiveness communication to the audience, Like any other offering from ZION this solution is backed up with the extensive direct on-site support by ZION. We are the principal importer for this product directly from the principle for India our back to back support model with manufacturer and the advance standby unit to customer in the event of failure. Standard 12 Month warranty along with AMC options shows our broad roadmap plan to support the solution.

So Get ready to implement an INNOVATIVE Solution which

- Designed for the perfect Interactive User Experience
- Convert any surface/screen into a Touch Screen within few seconds
- Whiteboard Application features to improve the natural writing experience
- Full interactive Support of all Windows application
- Spotlight feature to address the Large presentation experience
- Desktop/ Application screen annotations- folder writing

Turn the wall into your computer's touchscreen immediately and make presentations easier

Used together with any type of projector, this Portable USB Interactive Whiteboard connects to your computer through USB and captures the IR pen movement on the projected image through its IR sensor. It enables you to draw, circle, or highlight on your presentation using an IR-enabled pen. Finally you can move around freely without being chained to your computer and impress your audience with your presentation!

It's very easy to set up and use. Simply connect the receiver to your computer, then turn on your projector. The driver software for the receiver can be installed in just a few seconds. Open the installed software and then follow the instructions shown on the screen to calibrate. The installation and calibration can be done within two minutes. Once you are finished, the projected image on the wall will turn into your computer's touchscreen! You can use the pen to open programs or files, draw, and perform various tasks just like you do with your mouse!

Suitable for classroom teaching, business presentations, or interactive presentation, this Portable USB Interactive Whiteboard is the next generation interactive solution that you should definitely own.
